

AkuRy-Stick

**Energetic Harmonization of Electro-Smog.
Improves Concentration, Performance & Cell Regeneration.**

Effects

The AkuRy-Stick is designed to counteract the impacts of electro-smog (e-smog). The positive effects of using an AkuRy-Stick include the strengthening of your power of concentration and performance, and an improved regeneration of your body.

Background

E-smog exists as a result of electromagnetic fields and radio waves such as those emitted by computers, wireless routers and wireless phones (DECT phones and cell phones).

Unprotected, these devices generate a 'chaotic' electronic frequency, comparable to the acoustic emission such as traffic or construction noise, or some other form of noise pollution.

Electronic noise stresses the human body. It can cause, for example, concentration problems, irritability and nervousness, muscle tension, headaches and malaise.

Even though humans may not consciously recognize 'e-smog', the human body itself may register a general change of sensitivity and temperature (resulting from the physical stimulation of the water molecules within our cells).

Electro-sensitive people especially react to even low radiation exposure and suffer with symptoms such as tingling, loss of energy, poor concentration and demands for increased water consumption.

The AkuRy-Stick works as a filter against man-made electromagnetic fields and radio waves and can be comparable to a 'noise filter' that helps prevent traffic noise.

Functionality

Transistors (integrated circuits) represent the essential components in microelectronics, communication technologies and computer systems. In USB-Sticks, integrated circuits form part of the Flash memory used for data storage.

Transistors mainly consist of Silicium (Silicon). Silicon is widely known for providing the essential element used in quartz clocks. Due to its 'semiconductor' characteristic, it's suitable for both information processing and storage. 'Energetically' silicon is also an important mediator.

With silicon as a common component, the AkuRy-Stick can manipulate the electro-magnetic waves emitted from computer systems, therefore harmonizing the harmful waves energetically.

How to Use the AkuRy-Stick

Simply plug the AkuRy-Stick into the USB-port of your computer or Mac. Nothing else is required; however you may use your AkuRy-Stick for data storage purposes, or even as a 'protective' pendant if you wish.

Technical Data

The AkuRy-Stick is partitioned into a usable area (partition 1) and an encrypted and hidden area (partition 2). It acts as a normal USB memory stick; however, its memory has been reduced by approximately 240 MB in total storage capacity.

The usable area is formatted with FAT32, and thereby compatible with most operating systems. You can re-format this area if necessary (even with the Mac OS Extended format).

However, do not try to mount or decrypt the hidden area (partition 2), as this could damage the partition. Also, any new partitioning of the AkuRy-Stick will destroy its energetic power.

Operating Systems:	Microsoft Windows [®] , Mac [®] OS, Linux [®]
Interface:	USB 3.0
Formatting:	FAT32
Storage capacity:	7.74 GB
Free memory:	ca. 7.5 GB
Dimensions:	ca. 20.5 × 12.3 × 4.5 mm
Weight:	ca. 3 g

Important Notice

The best protection against e-smog is to avoid it physically (ie. it's recommended that you switch off your devices at the fuse box). However, if you have to remain in an area where radiation is emitted, the AkuRy-Stick can help make these frequency emissions more tolerable for the body's systems.

Be aware that the functionality of the AkuRy-Stick is only partly confirmed by research and that its positive effects cannot be guaranteed. Therefore, the AkuRy-Stick does not represent a cure, nor do we promise 'protection' such as that stated under the Therapeutic Products Advertising Code. This information is not a substitute for professional medical advice. Also, it is not intended to diagnose or treat a health problem or a disease. In these cases you should always consult a doctor.

Order

You can order the AkuRy-Stick directly from www.akuryprodukte.ch.

Manufacturer data

AkuRy GmbH
Gabelsberger Str. 3
D-63225 Langen

Ust-IdNr: DE35 228 21617
HRB 43161
Amtsgericht Offenbach am Main
Managing Director: Heiko Wenner

Tel.: +49 (0) 6103 922840
